

Alodine EC²

First and only multifunctional coating for light metals

Alodine EC² is a highly specialized electro ceramic coating applicable to aluminum, titanium and its alloys.

Alodine EC² combines outstanding features in one profile making it fit for high end performances.

Using Alodine EC² complete production processes may become obsolete.

Alodine EC² can support you in saving time and money and increase productivity.

Henkel experts have in-depth knowledge of our customer's needs. Hence we are able to formulate unique solutions that contribute to the efficiency and quality of surface treatments.

For more information on how Alodine EC² can improve your production process – as well as your bottom line call 0211-797-3000 or visit www.henkel.de
