

## TURCO AA10

### LIQUID ACID AIRCRAFT TOILET CLEANER

Turco AA10 is a ready to use liquid acid cleaner specially formulated to remove the contaminants and scale that collect in the vacuum waste tubes in aircraft toilet systems.

As specified by Boeing in "procedures for waste tank servicing" the following steps for each toilet in the airplane should be done one at a time (see Boeing 767 Maintenance Manual).

Add approximately 2 liters of crushed ice to the toilet bowl.

Add approximately 2 liters of Turco AA10 to the toilet bowl. Immediately flush the toilet until it is empty.

Immediately add 4 liters of water to the toilet bowl.

Flush the toilet to remove the cleaner from the toilet.

**Caution:** Flush the toilet immediately after adding the toilet cleaner to the toilet bowl.

Turco AA10 is an acid and can cause damage to the toilet if it stays in the toilet.

Do not allow the cleaner on the structure of the airplane as damage may occur.

**Caution:** Contains acetic acid. Avoid contact with eyes, skin and clothing. Do not take internally. Protective clothing such as acid resistant gloves and goggles should be worn when handling this product.
