

## Lusterite 2

### WET OR DRY AIRCRAFT CLEANER – POLISHING COMPOUND

Turco Lusterite 2 is a specially developed compound for chemically cleaning and polishing aircraft exterior surfaces – with or without the use of a water rinse.

#### Description

A creamy brown emulsion. Removes all types of jet aircraft soils, including SKYDROL, synthetic engine oils, carbon, grease and other associated aircraft operation deposits.

#### Features

- Forms protective film on surfaces to allow ease of subsequent cleaning.
- Restores luster to paint and aluminum surfaces.
- For use on all aircraft metals including high strength steel and paint.
- Non-crazing to Plexiglas
- Removes carbon from white tops and engine exhaust areas.
- Excellent for cold weather cleaning, in combination with antifreeze.
- Easy to remove.

#### Use instructions

1. For normal use, mix 2 parts Lusterite 2 to 1 part of water.
2. Apply by mops, brush or spray. Agitate until all soil and paint oxidations are loosened.
3. High-pressure water rinse.  
OR remove with mops while still wet.  
OR allow drying and mop off.  
(For dry cleaning, mop application and removal is recommended).

#### Caution

Contains petroleum distillate. Harmful or fatal if swallowed. See product label for additional precautionary and handling information.
