

# Turco<sup>®</sup> R 9100 GL

An Environmentally Advantaged Alkaline Activated Paint  
Remover for Composites

## Product Information Bulletin

### DESCRIPTION:

Turco R 9100 GL is a neutral, low odor, thixotropic paint remover designed for use on composite surfaces. It was developed for effective stripping of polyurethane topcoats from intercoat-type paint systems. Turco R 9100 GL paint remover offers a significant advance in paint stripper technology. It complies fully with the aircraft/aerospace NESHAP regulations. Turco R 9100 GL can also be used on aluminum, mild steel, high strength steel, cadmium plated steel, titanium and magnesium when used as directed.

### OPERATING PARAMETERS:

The product is used as is. It is recommended that heavy oils and greases be removed from exterior aircraft surfaces prior to application of Turco R 9100 GL. Use a suitable, approved exterior wash, such as Aerowash. Apply a uniform coating to surface being stripped by means of non-atomizing spray. Allow sufficient time for stripper to work. Performance improves as temperature increases. Agitation with a stiff bristle brush will aid in removal of the finish. Repeat if necessary.

### THE PROCESS:

<u>Step</u>	<u>Description</u>
1	Exterior Wash with Aerowash (optional)
2	Water rinse and allow to dry (optional)
3	Apply Turco R 9100 GL and allow sufficient dwell time
4	Squeegee off, reapply if necessary
5	High pressure water rinse
6	Prep for conversion coating and paint application

## FEATURES & BENEFITS:

- Paint remover designed for use on composite surfaces
- Low odor, fast stripping, NESHAP compliant
- Contains no HAPS , heavy metals, phosphates, borates, silicates, or peroxide
- Also safe on aluminum, titanium, magnesium and mild and high strength steels
- Excellent cling to vertical and overhead surfaces
- Meets the corrosivity requirements of SAE MA 4872
