

Custom Packaging Options for MRO

Loctite Aerospace offers several [custom packaging options](#) that are especially suitable for repair operations. Mixing small quantities of two-component materials is easily accomplished with cartridge kits and E-Z PAKs.

Reduction of Hazardous Waste

With conventional adhesive handling systems, transferring adhesive from one container to another generates large quantities of hazardous waste. When the adhesive is dispensed from the cartridge, the cartridge is left with a negligible amount of adhesive and can usually be disposed of in a less costly way.

Improved Employee Productivity and Safety

Conventional adhesive handling systems rely on a worker to measure, transfer, mix, and dispose of resin, catalyst and cured material waste. This process of mixing and preparing the adhesive for application diminishes employee productivity. Custom packaging offers the ability to store, meter, mix and dispense the adhesive, minimizing worker exposure to any hazardous material.

Loctite Aerospace provides custom packaging services for Hysol materials. Purchasing your Hysol custom packaged material direct or from an authorized Loctite Aerospace distributor is the best way to assure compliance with OEM specifications and FAA regulations on traceability. Please call with your Hysol material dispensing or packaging application requirements.

Types of Custom Packaging

CARTRIDGE KITS

Barrier cartridge kits and injection cartridge kits are disposable plastic cartridges capable of mixing two-component materials prior to dispensing. They are available in 1 oz to 10 oz sizes.

Barrier-type cartridge kit

Injection-type cartridge kit

E-Z PAK®

E-Z PAKs provide a high integrity barrier pouch divided by an easily removable clip. The clip separates two compartments, which can hold almost any two-part adhesive paste.

DUAL CARTRIDGE / STATIC MIXER KITS

Dual cartridge/static mixer kits store two-component materials, which can be mixed during the dispensing of the product through a static mix nozzle. They are available in 50 ml to 1500 ml sizes.

PUDDING CUPS

pudding cups offer the convenience of hand mixing with the assurance of correct mix ratios. They are available in a variety of fill sizes designed to fit your processing needs.
