

# TURCO Aircraft Disinfectant

## GIVES 4 WAY CLEANING ACTION: CLEANER - GERMICIDE - SANITIZER - DEODORIZER

If you are using an ordinary cleaner you are working too hard and spending too much money. When you use TURCO Aircraft Disinfectant, you eliminate the separate maintenance steps of cleaning, sanitizing and deodorizing and combine them all in one easy, effective application – rinsing is not even required.

### DISSOLVES SOIL IMMEDIATELY

TURCO Aircraft Disinfectant contains a special scientifically blended combination of ingredients, which give the product the ability to immediately break down any common soil. TURCO Aircraft Disinfectant quickly, easily and thoroughly removes all types of dirt, grease, grit, hard-water scale, and soap scum. In heavier concentrations it will even remove floor wax. Amazingly enough, TURCO Aircraft Disinfectant is highly efficient in cold water as well as hot, in hard water as well as soft.

### KILLS GERMS ON CONTACT

TURCO Aircraft Disinfectant is a true germicide.... not just sanitizer. This effective product kills many germs including Staphylococci and many other dangerous bacteria that may threaten the health of aircraft occupants.

A REAL DEODORIZER, NOT JUST A "COVER-UP"

By destroying many bacteria, TURCO Aircraft Disinfectant destroys the source of most odors. Rather than merely perfuming a disagreeable smell, TURCO Aircraft Disinfectant hits the cause - and leaves the air sweet and truly clean.

### COMPLETELY SAFE TO SURFACES

TURCO Aircraft Disinfectant is safe for use on all common aircraft metals and painted surfaces. Although a strong TURCO Aircraft Disinfectant concentration will remove wax in a hurry, a mild solution would not even dull the shine.

### ONE OF TODAY' S BIGGEST BARGAINS

You might expect to pay a premium price for TURCO Aircraft Disinfectant...not so!

TURCO Aircraft Disinfectant costs no more than ordinary maintenance cleaners, in fact a great deal less than some cleaners that are not even true germicides. But that is not all!

TURCO Aircraft Disinfectant goes farther . . . it is super concentrated. You get superior cleaning and germicidal action at one half the concentration required by many products.

### HOW TO USE TURCO Aircraft Disinfectant

1. As a cleaner germicide: mix 1 part Turco Aircraft Disinfectant with 25-50 parts of water. Turco Aircraft Disinfectant is efficient in cold water; however, hot water will increase its effectiveness.
2. As a cleaner-sanitizer: mix 1 part Turco Aircraft Disinfectant with 50 parts hot or cold water.

3. As a cleaner-deodorizer: mix 1 part Turco Aircraft Disinfectant with 50 parts hot or cold water.
4. For damp-mopping floors mix 1 part Turco Aircraft Disinfectant with 50 parts hot or cold water.

## APPLICATION

TURCO Aircraft Disinfectant solution can be applied to all surfaces by mop, sponge or cloth.

### REMOVAL

Pick-up all TURCO Aircraft Disinfectant solution and dirt. Let surface dry completely. Rinsing is not required, but desirable for most effective removal of loosened dirt film.
